Professional Summary

ISTQB (CTFL-V4.0 & CT-MAT) certified Software Quality Control Engineer

With ITI training and nearly 2 years of experience across **FinTech, B2B E-commerce, and Healthcare.**

Proficient in writing and executing **test cases**, documenting clear technical **bug reports**, defect tracking (Jira, Trello), postman **API testing**, web automation (Selenium WebDriver, TestNG), UI/UX Auditing, and collaborating with developers to resolve and verify fixes and ensure high-quality product delivery and reliability. Specialized in **manual, exploratory, and functional/regression testing** for high-stakes platforms.

With proven ability to identify critical logic flaws, Common security vulnerabilities, and performance bottlenecks.

Familiar with **Agile methodologies** and **software development lifecycle (SDLC)** processes.

Technical Skills

- **Testing:** Agile, SDLC, Functional Testing, Regression Testing, Exploratory Testing, End-to-End (E2E) Testing
- **Manual Testing:** Test Case Design, Execution, Defect Reporting (Jira, Trello), Test Strategy Contribution
- **Automation (Foundational):** Selenium WebDriver, TestNG, Page Object Model (POM), Data-Driven Testing
- **API Testing:** Postman (Manual), Newman, RestAssured (Automation)
- **Programming:** Java, OOP, C++, C, HTML, CSS
- **Databases:** SQL, MySQL
- **Version Control:** Git, GitHub
- **CI/CD & Build Tools:** Jenkins (Basic), Maven
- **Reporting:** Allure Reports, Spark Reports
- **Operating Systems:** Windows, Linux, Android, iOS
- **Test Management Tools:** Microsoft Office, Google Workspace, Jira, Trello, Figma (UI Verification).

Certifications

ISTQB Certified Tester – Mobile Application Testing (CT-MAT)

Issued: Mar 2025 | ID: [250219023](#)

ISTQB Certified Tester – Foundation Level v4.0 (CTFL)

Issued: Jun 2024 | ID: [240523040](#)

Internship

Software Testing Scholarship, Information Technology Institute (ITI)

Nov 2024 – May 2025

Education

Bachelor of Business Administration (BBA), Finance

Alexandria University | Grade: Good

High School National Certificate

Victoria College Language School | Grade: 93.5%

Professional Experience

Quality Control Specialist | The Tailors (Software House), Elsheikh Zayed-Giza

Aug 2025 – Present

- **Key Project: Tabib Group (Healthcare & Booking):**
Executed cross-platform testing for a multi-million Riyal healthcare ecosystem Serving Saudi Arabian market. Logged 78+ unique defects, ranging from appointment scheduling logic flaws to UI crashes on mobile devices.
- **Key Project: Storeus Gomla (Multi-tenant wholesale B2B E-Commerce Serving Egypt and UAE):**
Validated complex multi-tier pricing algorithms and financial checkout flows.
Caught 15+ high-priority errors, including subtotal calculation swaps and security permission leaks.
- **Key Project: Logic (HR Assessment Tool):**
Audited role-based access for 6+ user levels
and validated a nested calculation engine for talent scoring matrices.
- **Agri-Tech (Toushka):** Audited Real-time trading transactions,
Managed a product catalog and tested a rate commission trading engine between Flutter mobile and backend.
- **Additional Projects:**
Arabian Peaks (Boat Reservations), **Royal Crown** (FinTech/VIP Cards), and **CP Portal** (Construction ERP).

Software QC Engineer (Part-Time) | Medicta (Healthcare) | Remote

Oct 2025 – Present

- Performing manual testing across a 4-tier healthcare system (Web, Mobile, Provider Portal, Admin).
- Executing manual performance audits using DevTools to identify redundant API requests causing 2-minute report loading latencies.
- Documenting 500+ unique functional, UI/UX and performance defects, helping leveraging project's quality.

Freelance Software Tester | Remote

Jun 2024 – Aug 2025

- **Indstrz (UN-Backed B2B Marketplace):**
Validated B2B procurement logic, including MOQ compliance and multi-tier pricing validations.
- **Hejn (Saudi Camel Racing Federation):**
Conducted mobile testing for registration, ownership transfers, and localization across Arabic/English versions.
- **Exvaly (FinTech Mobile):**
Tested real-time currency conversion engines and camera-based OCR price-tag scanning.
- **Tabor.live (Queue Management):**
Identified critical security risks, including SQL injection and plain-text credential transmission.
- **S&T (Retail Scan & Go):** Validated mobile barcode scanning and postman API-level registration flows.
- **Petitions (Civic Engagement):** Identified 76 defects in a multi-role Laravel platform.
- **Locaget (Internal CMS):** Verified Figma-to-Web implementation, documenting 60+ UI discrepancies.
- **Dominical Wheels (Automotive E-comm):** Logged 55 defects in search filtering and checkout logic.
- **Bookmaker (SaaS Authoring):** Caught 78 defects, including critical data isolation issues and navigation 404s.
- **Tripper (AI Travel Planner):** Performed compatibility testing and competitive feature gap analysis.
- **Tho5or & Flextock:**
Validated 3rd-party logistics integration, identifying address mapping failures that blocked order fulfillment.
- **Hajj & Umrah Portal:**
Executed User Acceptance Testing (UAT) for a public sector platform, logging 59 functional/UI defects.

ITI Projects

Swag Labs Web Automation Project – *ITI Graduation Project*

Designed and implemented an end-to-end test suite for the Swag Labs e-commerce demo.

Technologies: Java, Selenium, TestNG, Maven, Jenkins, POM, Allure | [Link](#)

Trello API Test Automation – *ITI Team Project*

Developed a framework to validate API responses and data integrity for Trello's APIs.

Technologies: Java, RestAssured, TestNG, Postman, Newman, Spark Reports, GitHub, Google Sheets | [Link](#)

Guru99 Online Banking – *Manual Testing Project*

Created and executed test cases for modules including login and deposit.

Technologies: Manual Testing, BVA, EP, Google Spreadsheets | [Link](#)

Paint Program – *Java Development Project*

Built a basic paint application using Java and OOP principles.

Technologies: Java, OOP | [Link](#)

Fruits Market Website – *Frontend Project*

Developed a simple user interface using HTML and CSS.

Technologies: HTML, CSS | [Link](#)
